HARP Body Scan Solutions

Density Counting Solution

Density Counting Solution

Basic System -one in one out

Control the amount of people you have entering your store, gym, bar or office area. A multi-camera system that will track and control the amount of people in your environment. At the entrance a display will show the occupancy and automatically control the flow through a signage display the amount of people allowed to enter. As people exit the entrance count will reduce allowingmore people to enter.
